Rookery Software and FulcrumWay announce a strategic alliance to meet the growing security and risk management demand by Oracle customers

London, United Kingdom – June 30th, 2015 FulcrumWay, a leading provider of risk based enterprise controls management solutions, and Rookery Software, author of the award winning Oracle E-Business Suite configuration management software ConfigSnapshot, announced today, at the UK Oracle Users Group Applications Innovation Day, a strategic alliance to provide application security and controls solutions to Oracle E-Business Suite Customers. The combined solutions will enable Oracle customers to download Oracle EBS access and configuration controls from the FulcrumWay SmartCloud™ directly into ConfigSnapshot software to detect security policy and control violations. In addition, Oracle customers will be able to access risk remediation and mitigation advisory services to ensure compliance with business policies and regulations such as Sarbanes-Oxley, Dodd-Frank, PCI, FCPA and UK Bribery Law.

 ConfigSnapshot software is widely used by Oracle customers around the world to monitor configurations during the implementation, upgrade, deployment and maintenance of Oracle E-Business Suite. The product is designed to document, analyze, compare, monitor, plan, migrate and track configuration changes in Oracle E-Business Suite. The latest release of the product also enables the customers to test access controls such as Segregation of Duties.

FulcrumWay SmartCloud™ is the largest online database of risks and controls for E-Business Suite and other ERP systems. The SmartCloud services include inherent enterprise system risks in key business functions including financial reporting, distribution, supply chain planning, and human resource management enabled by enterprise system such as Hyperion, Oracle E-Business Suite, PeopleSoft, and J D Edward. Business Executives, Process Owners, IT Application Managers and Auditors can access SmartCloud to assess risks and select mitigating controls from a catalog of over 1,000 controls to reduce risk in significant business cycles like Account-to-Report, Procure-to-Pay, Order-to-Cash, Hire-to-Retire and Design-to-Release.

"Many organizations have been seeking affordable and reliable ways to segregation of duty access controls and embed mitigating controls in their ERP Systems to prevent operational waste, regulatory penalties, and financial fraud", said Jane Jones, Director of Global Sales Channels and Alliances at FulcrumWay and a ten year GRC industry veteran. She added "in the early days, our customers need to deploy controls was hampered by the cost and complexity of such controls. With an integrated offering between Rookery Software's ConfigSnapshot and FulcrumWay's SmartCloud™ that is now available for the Oracle E-Business Suite, we can help overcome this challenge by providing complete control coverage in just a few days at a fraction of the cost. We look forward to continue working closely with Oracle customers and the ConfigSnapshot team to reduce enterprise risk for our customers"

"We are excited about this partnership which now enables our customers to instantly access a comprehensive catalog of segregation of duties controls to reduce their application security risks. Furthermore, our customers are able to leverage their investment to extend our configuration management application to provide automated controls that mitigate business risks", said Andy Harriss, director of Rookery Software.

About FulcrumWay
